HOW RANKS WORK

Permissions stack upwards

Each rank keeps **everything** the rank below it can do.

Management

Helper › Mod › SrMod › Admin › Manager › General Manager — with the **Owner** above the track.

GOOD TO KNOW

Three things to remember

1. **Everything below you is yours too.** If a lower rank has it, so do you.
2. **Every staff member gets all Celestial perks** — Helper inherits the paid Celestial group.
3. **Not locked to one server.** The staff chain also applies on the Hub and SMP.

This guide is **Skyblock-specific**. SMP permissions will be released later — verify a command on the server you are on before relying on it.

OUTSIDE THE STAFF TRACK

Marketing & Media

These two groups are **not staff**.

Marketing

- Fly
- Spectator and Survival gamemode

Media

- Inherits Turtle
- Fly
- Spectator gamemode

Neither group is on the staff track, and neither has staff permissions listed in the guide.

NOT SURE WHO TO ASK?

Who to go to

- **Helper** — warns, mutes, kicks. Pass bans and rollbacks to a **Mod+**.
- **Mod+** — bans, vanish, rollbacks and appeal reviews.
- **SrMod+** — severe, sensitive or hard cases and IP bans.
- **Admin+** — staff misconduct reports (restricted ticket).
- **Luke (Owner)** — message on Discord if the report is about an Admin.

BEFORE YOU GO

Access isn’t permission

1. Your rank decides what the server **allows** — not what is **appropriate** every time.
2. **Verify a command** on the server you’re on. Don’t assume it works the same everywhere.
3. Ask before using an **unfamiliar command** or high-impact action.
4. Use your access only for **legitimate staff tasks** — never personal gain.
